

SEA-90™

SeaAgri, inc

Partnering With Nature

Unrefined Mined Marine Minerals
100% Natural & Water Soluble
Includes Trace Elements
USDA NOP & OMRI Listed™
Foliar Fertilizer & Soil Amendment
Livestock Feed Ingredient &
Trace Element Mineral Salt

The Ocean gave birth to life on Earth. Over two billion years ago, the first simple bacteria appeared in Earth's early seas. Throughout geological history, the seas were the primary reservoirs of life as evolution advanced and regressed through the ages. Today, the seas are the cradles of life. Earth's greatest sanctuaries of biodiversity are the seas.

SEA-90 is natural crystal from seawater. These pure simple salts are not refined, adulterated or processed in any way that alters their original nature. The crystals contain **all elements found in seawater**. Only a few gases and volatile elements are missing. **All Minerals and Trace elements required to sustain biological life are present.**

SEA-90 is unlike other fertilizers and animal mineral supplements. It is **not** a simple single-metal salt, such as sodium chloride, magnesium sulfate, or calcium carbonate. **SEA-90** is a **balanced blend** of the sea's elements and nutrients, including the **major minerals, minor minerals and trace elements**—even rare metals like silver, gold, platinum, and radium.

In the Ancient Seas, all creatures, from simple kelps and corals, to shellfish, fish and marine mammals, share direct access to **full-spectrum fertility**. Every element and nutrient necessary to sustain healthy biological life is readily available in naturally balanced seawater.

SEA-90 is **Dr. Maynard Murray's Sea Solids**. Thirty years of research by Dr. Murray proved that soils enhanced with a **full menu of 90+ marine minerals** grow crops superior to those conventionally grown.

SEA-90 is **100% natural, water-soluble, non-synthetic mined mineral sea salt** and listed by the **USDA National Organic Program** and **Organic Materials Review Institute (OMRI)** for use in the production of **organic food and fiber and as livestock trace mineral salt**. **SEA-90** quickly dissolves to disburse the sea's full spectrum of **minerals and trace elements** into the soil following a thorough rain or watering, and also dissolves easily for spraying or misting onto foliage and soil. **SEA-90** can be offered free choice to livestock or mixed into feed and mineral mixes.

SEA-90 is the **only water-soluble fertilizer** containing the sea's perfectly balanced nutrients and elements in a readily available form. When water is extracted from seawater, 3.5 percent remains as solids--minerals in their simplest elemental form--with a speck of organic residue. Significantly, the elements in seawater are at essentially the same ratios as **human blood**. This **natural full spectrum** menu of **minerals and trace elements** is perfectly proportioned and balanced to sustain **optimum biological life**.

SEA-90 is obtained from tidal pools in a select area of desert seacoast that meet **Dr. Murray's** stringent criteria for purity and proportion. At high tide, mineral-rich seawater flood tidal pools that quickly dry into **crystals** with elemental and biological composition identical to seawater.

SeaAgri is honored to supply **SEA-90** to **Soil Stewards**--growers who sustain maximum soil fertility and produce the highest quality and nutrient dense crops, seeds, feeds, and animal production that deliver optimum health and vitality to humans, animals, and all life on our planet.

SEA-90 is provided exclusively by **SeaAgri, inc.** Dr. Murray shared his knowledge and research with Robert Cain founder of **SeaAgri**, in his book **Sea Energy Agriculture**, and more recently, in Charles Walters' new book **Fertility From The Ocean Deep** (both available from Acres USA).

Maynard Murray M.D.

Medical Doctor and Research Scientist

Dr. Maynard Murray was perplexed that Americans are living longer, yet chronic illness, degenerative diseases, and physiological suffering steadily increased. Dr. Murray searched for the key to improve human health. He began his medical research by studying animal species that seem to possess inherent immunity to diseases.

Dr. Maynard Murray's research led to the discovery that sea life does not suffer from cancer or other degenerative diseases. Incredibly, the only difference between life on land and that in the sea is sea life's exposure to a perfect balance of all elements in the Periodic Table. To study this remarkable resistance, Dr. Murray fertilized vegetables with seawater. As a result, the vegetables flourished with increased resistance to disease, and provided improved taste!

Dr. Maynard Murray found the secret to human health in the Sea! **Seawater** contains almost all elements in **The Periodic Table of Elements** in perfect balance. He discovered our health (or lack of) is directly linked to the **minerals and trace elements** in the foods we eat. Our soils are deficient due to erosion, leaching, and poor soil management. **It is imperative to remineralize our crops, pastures and soils with the full menu of elements from the Sea for optimum health!**
